SUMMARY

Computer Science Engineering student at Kamaraj College of Engineering and Technology with a strong academic record (CGPA 9.04) and proficiency in Python and Java. Hands-on experience in Machine Learning, including CNN-based detection systems, with strong problem-solving, communication, and time-management skills. Passionate about technology, with experience in technical symposiums and project presentations, and committed to continuous learning and growth.

EDUCATIONAL QUALIFICATION

Degree / Level	Institution	Year	Score
B.E. (Computer Science & Engineering)	Kamaraj College of Engineering and Technology	2024 - 2028	CGPA: 9.04
HSC (Higher Secondary)	Kshatriya Girls Higher Secondary School	2024	94.5%
SSLC (Secondary)	Kshatriya Girls Higher Secondary School	2022	98%

TECHNICAL SKILLS

Languages	Python, Java
Machine Learning	Convolutional Neural Networks (CNN), Model Design & Training
Frameworks	TensorFlow, Keras and Streamlit
Database	MySQL
Version Control	GitHub
Soft Skills	Problem-Solving, Communication, Time Management

INTERNSHIP

Machine Learning Intern — Paruvaththe Payir Sei (PPS) <i>Kamaraj College of Engineering and Technology</i>	Internship Duration: 08/12/2025 – 22/12/2025
Completed a hands-on internship focused on Machine Learning algorithms conducted by Paruvaththe Payir Sei (PPS) at Kamaraj College of Engineering and Technology.	
AI & ML Intern — Edutantr <i>Bangalore, Karnataka</i>	Internship Duration: 10/06/2026 – Ongoing
Currently undertaking a hands-on internship at Edutantr focused on Artificial Intelligence, Machine Learning, and Data Science, gaining practical experience in AI/ML concepts, data analysis, and model development.	

PROJECTS

Memora: Dementia Detection System
Developed a deep learning-based dementia detection system using a Convolutional Neural Network (CNN) to extract relevant features from brain imaging data and classify images into different dementia-related categories, supporting early-stage detection and automated analysis. <i>Technologies: Python, Machine Learning, CNN, Hugging face</i>
Prepwise AI: AI Study Planner
Developed a Generative AI-powered study planner using Google Gemini and LangChain to create personalized, adaptive study schedules based on subjects, exam dates, study goals, and preferred study intervals through an interactive Streamlit application. <i>Technologies: Python, Generative AI, Google Gemini, LangChain, Streamlit</i>

CERTIFICATES

Infosys — Java Foundation Certification: Validated core Java programming concepts including OOP principles, exception handling, and collections framework. Cisco — Cybersecurity Essentials: Gained foundational knowledge of cybersecurity principles, threat landscapes, and best practices for protecting systems and data.
--

ACHIEVEMENTS

- Secured 2nd place at the National-Level Symposium (Technical Quiz) held at Bannari Amman Institute of Technology, Erode. - Participated in various intercollegiate symposiums, presenting papers and competing in technical events. - Solved over 50+ coding problems on LeetCode.
--
